

We the undersigned show our support for the Institute of Comparative Irrelevance (IVI) in Frankfurt. We sign this declaration in order to promote the permanent maintenance of this independent cultural center. The Institute for Comparative Irrelevance provides space for scholars, bands, artists and activists to live theory and praxis, party and realize their alternative social ideas.

Given the current situation in the university and in society at large, projects like the IVI which allow for critical engagement with and reflection of this situation are more necessary now than ever before. Socially exclusive restructuring of ever larger parts of urban spaces is on the rise. It's indispensable for critical thinking to take the time and space it needs in order to counter these developments decisively.

That's why we strongly champion the Institute Comparative Irrelevance. It has to stay and continue enriching the urban culture of Frankfurt!
